

22nd International Conference on Recent Progress in Many-Body Theories

Conference Topics include

- Computational quantum many-body physics
- Condensed matter physics
- Non-equilibrium many-body phenomena
- Nuclear and subnuclear physics
- Quantum chemistry, atomic and molecular physics
- Quantum fluids and ultracold gases
- Quantum information and computation
- Other topics in new frontiers

International Advisory Committee

Cristian D. Batista (Knoxville, USA)
Raymond F. Bishop (Manchester, UK)
Jordi Boronat (Barcelona, Spain)
Siu A. Chin (College Station, USA)
John W. Clark (St. Louis, USA)
