MCRP

Work flow from application to start of utilization

% In the following pages, the works indicated by yellow and orange diagrams must be done by all the project members and the project leader, respectively.

Works performed by CCS

Works performed by all the project members

Work performed by the project leader

- December, 2024

From proposal submission to approval

Call for MCRP proposals

Proposal must be submitted online through the indico system.
All the members including the project leader must go through "member registration".

Project leader

1. Obtain an account on the indico system**[1,2]**
2. Submit the proposal
3. Perform the member registration of himself/herself
4. Inform the proposal ID and your registered email address to all the project members
5. Confirm that all the members are registered properly

#1 Do not obtain more than one indico account. The account will be valid for applications in the following years.
#2 If you obtained the account before, use that account. However, if the registered email address on that account is invalid, change it through "My profile". It is absolutely necessary that the project leader can receive emails at the registered address.

Other members

1. Perform the member registration
   (Unnecessary to obtain an indico account, but necessary to get the proposal ID and the email address of the project leader.)

Notification of (dis)approval

In addition to the notification of approval, the project leaders are informed how to create user accounts on supercomputers by emails. Follow the instruction to create the accounts.

Post-approval procedure: User account on Miyabi

Inquiry about user information by email (User authorization by project leaders)

・Submit "Project user authorization file" with user information

Are you non-residents or subject to any "Specific Categories"?
— yes → ・Submit "Supercomputer Utilization Application Form (oversea users)"
— no ↓

Creation of user accounts, and/or additional link to the project

Even for continuous projects, the job submission is allowed only after completion of the user authorization by the project leader.
User names are automatically created.
All the users, who are either non-resident or subject to any "Specific Categories", must submit the supercomputer utilization application (oversea users) every year.

Email notification of the completion

Continuous utilization?
— yes → ・Utilize Miyabi with the existing user account
(In participating new projects, the completion of the additional link to the projects is notified by email.)
— no ↓

User account on Pegasus?
— yes → ・Login on Pegasus, then, obtain an initial password for Miyabi user support portal
(The email notifying the completion of user account contains information how to find the initial password. It should be in the private file accessible only by the user.)
— no ↓

The initial password is necessary to login the Miyabi user support portal Web site, on which the user should register his/her ssh public key.

Notify an initial password for Miyabi user support portal

・Access the Miyabi user support portal with a browser, and register the ssh public key (URL is provided in email notification of the completion.)

Start usage

Post-approval procedure: User account on Pegasus

Pegasus user account

Do not create more than one user account. If you were a former user of CCS supercomputers (T2K-tsukuba, HA-PACS, COMA, Cygnus), you should use the same username.
Do not apply for more than one Unified-ID (UTID-13). The UTID-13 starting with 007 is valid until you delete the ID. If you obtained the unified-ID before, you must use it.
All the users, who are either non-resident or subject to any "Specific Categories", must submit the supercomputer utilization application (oversea users) every year.
Project leaders must distribute to the project members the information how to create the user account.

Email how to create user account

Have user account on Pegasus? — yes → · Existing user account on Pegasus (with public key)

no

Had user account on CCS supercomputers? — yes → ·Send the former username and UTID-13 to ccs-sc-register@ccs.tsukuba.ac.jp together with a new public key

no

Have UTID-13? — no → ·Submit the Unified-ID application form （UTID-13 and initial password, which are necessary for the first-step registration, will be sent by post.)

yes

Are you non-residents or subject to any "Specific Categories"? — yes → · Submit "Application for security export control"

no

·First-step registration on CCS-SC user registration system. Inform the username to the project leader.

·Registration of the project-affiliated users by project leader

·Second-step registration on CCS-SC user registration system

Participating other projects? — yes / no

· Registration of the project-affiliated users by project leader

Register the user accounts

Notify the completion of account creation, and/or additional link to the project
